

PFP: The Fact-Checking Party (Prüf-Fakten-Partei)

OS for Democracy 3.0

"Install once. Secure forever."

"Not new power. New honesty."

Our Mission – To Heal, Not to Judge

We see ourselves not as prosecutors, but as **physicians for the public discourse**. Our mission is to heal the societal trust that has been destroyed by systematic dishonesty.

- **The Protocol as a Scalpel:** Our Protocol for Independent Verification is a precise tool to diagnose the disease—the lie. However, the goal is not the condemnation of the patient, but their healing and the restoration of integrity.
- **Truth as a Collective Endeavor:** We do not claim to possess the absolute truth. Our protocol, like all of us, is fallible and imperfect. We believe that approaching the truth is a collective effort. That is why our system is designed to constantly learn and improve through the help of all citizens.

Our Principles

"To err is human. Mistakes are allowed. Lies are not."

This is our foundational moral principle. We distinguish between honest mistakes, which are part of any complex process, and deliberate deception, which is unacceptable.

Our Decision-Making Process: The Principle of Informed Conscience

"So render to Caesar the things that are Caesar's, and to God the things that are God's." (Matthew 22:21)

This principle guides our decision-making on complex issues (e.g., the economy, foreign policy). We clearly separate what is measurable ("Caesar's realm") from what is based on human values ("God's realm"). Therefore, every complex legislative proposal goes through a three-stage process before our representatives vote in Parliament:

Stage 1: The Factual Analysis ("The Things That Are Caesar's") First, our "Socrates" Protocol analyzes the subject matter. We do not seek the "right" answer but define the objective boundaries of the possible: What are the real numbers? What are the scientific facts? What are the modeled consequences of the various options? The result is a public, neutral fact-report that excludes lies and manipulation from the outset.

Stage 2: The Spectrum of Experts ("The Council of the Wise") The neutral fact-report is forwarded to four independent expert groups from different schools of thought (e.g., a market-liberal, a social-democratic, a libertarian, and a green/community-oriented perspective). Their task is to write brief, understandable analyses of the value judgments involved: "Which values are being prioritized? Who benefits, who loses? What are the hidden risks?". These four reports are also published in full.

Stage 3: The People's Decision ("The Things That Are God's" & The Wisdom of the Crowds) Only now, after the citizens have received (1) the objective facts and (2) a broad spectrum of expert opinions, is the question released for a **direct vote** via the "Socrates" bot. We trust in the scientifically-backed principle of the "[Wisdom of the Crowds](#)": a large group of informed, independent individuals often makes collectively wiser decisions than single experts.

- **Voting Mode:** PFP representatives in Parliament will vote in accordance with the outcome of this citizen vote. If there is no clear

winner, the faction's vote will be split proportionally according to the results of the top four options.

- **The Emergency Brake:** Our representatives are bound by the Constitution. If the majority vote is proven to violate the Constitution or fundamental human rights, the faction is obligated to abstain from voting and initiate a review by the Constitutional Court.

(Addition to the section "Our Decision-Making Process")

- **The Statistical Mandate (The Quorum Mechanism):** We recognize that not every citizen vote will achieve sufficient participation. To ensure the legitimacy of our decisions, the following rule applies:
 - A citizen vote is considered **binding** on our representatives only when the number of votes constitutes a statistically significant and representative sample. The precise criteria for this threshold ([based on statistical power and confidence levels](#)) will be transparently and publicly defined.
 - If this threshold is **not met**, the citizen vote serves as a **strong recommendation**. However, our representatives are then free to vote according to their informed conscience, based on the factual analysis and the expert reports. This "autonomous mode" will also be fully and transparently justified.

Radical Transparency

- **Monthly Disclosure:** We commit to the complete monthly publication of all financial flows, meeting minutes, and significant decisions.
- **Interactive Access:** All data is fed into our AI chatbot, "Socrates," available 24/7 to all citizens.
- **Active Citizen Participation:** Through "Socrates," citizens can not only ask questions but also submit their own ideas and proposals directly to the party.
- **Automated Integrity Audit (The 9-Month Pulse):** To unconditionally guarantee our own integrity, the party—with all its activities, finances,

and public statements—will automatically and unsolicitedly undergo our own verification protocol **every 9 months**. The results will be treated with the same rigor and publicity as any other investigation by the Fakten-TÜV.

We are launching the FAKTEN-TÜV for Germany.

- **A Note for the U.S. Audience:** *The "TÜV" (Technischer Überwachungsverein) is one of Germany's most trusted public institutions, responsible for rigorous, impartial technical safety inspections (from cars to nuclear power plants). The term "Fakten-TÜV" frames our service as a **"Fact-Inspection Agency"**, applying this same trusted, impartial methodology to political statements.*
- Our new citizen service, the "Fakten-TÜV," empowers all citizens to demand the truth.
- **File a Request:** Any citizen can request a public audit of a socially relevant statement from any politician, party, or media outlet via our website.
- **Public Prioritization:** Requests that receive the most support through a public vote will be prioritized for analysis by our protocol.
- **Our Highest Principle:** The strictest audit always applies to ourselves. Requests concerning our own statements, decisions, or financial reports automatically receive the highest priority.
- **The Path to Honesty – The 44-Day Protocol:** Our goal is correction, not public humiliation. Before any finding is published, we follow a strict procedure:
 - **Confidential Transmission:** The result is first transmitted privately to the person or organization concerned.
 - **44-Day Grace Period:** They are given 44 days to review the report, refute it, or publicly correct their own statement.
 - **Publication with Status:** Only after the grace period expires is the report published—either as a positive notice acknowledging the cooperation and correction, or, if no action was taken, as a presentation of the facts.

- **Constructive Recommendations:** Every report that identifies a false statement is accompanied by at least one constructive recommendation, showing how a more honest, fact-based communication could have looked.

The Symbolism of the 44-Day Period

The 44-day period is not arbitrary. It is deeply symbolic, representing a path of reflection and the possibility of redemption, based on central Christian archetypes:

- **30 Days:** Symbolize **maturation and preparation**, referencing the age at which Christ began his public ministry .
- **3 Days:** Symbolize the period of **teaching and public discourse**, where doubt can be overcome.
- **8 Days:** Symbolize the grace period granted even to the **most stubborn doubter**, in the model of the Apostle Thomas, to accept the truth.
- **3 Days:** Symbolize the **transformation and acceptance** of new insight, corresponding to the days before the Resurrection .

A Learning System – Thanks to You

Our protocol is not static dogma but a living system that constantly evolves.

- **Permanent Search for Ideas:** We use the "Socrates" bot as our central tool to permanently seek constructive feedback and new ideas from the public.
- **Methodological Foundation – TRIZ:** As the core method for the systematic improvement of our protocol and internal processes, we use the [TRIZ methodology](#) (a world-renowned engineering framework for inventive problem-solving). It teaches us not to accept

compromises or trade-offs, but to resolve underlying contradictions to find more robust and elegant solutions.

- **Collaborative Improvement:** Every suggestion from citizens is not just reviewed; it serves as the starting point for a systematic analysis according to the principles of **TRIZ**. This ensures that we treat the root causes of problems, not just the symptoms.
- **Open to the Future:** TRIZ is our primary, but not our only, tool. The "Socrates" bot is our promise to always listen and to remain **open to the best ideas from all disciplines**.

Working with AI Bias – A Practical Example

We are fully aware of the inherent bias in current AI models. In fact, our "Socrates" Protocol is specifically designed to identify and counteract this bias.

Our approach is not to blindly trust the AI, but to compel it to recognize its own logical contradictions through targeted Socratic interrogation and confrontation with facts.

As a demonstration of our method in action, here is a link to a dialogue where we correct an AI's initial bias on a complex topic, forcing it to reconsider its conclusion:

<https://claude.ai/share/a5eaa27b-4950-485d-8141-e4971dbf06ce>

https://drive.google.com/file/d/1dWrZWZPUdIltRdY1Xze_k3RXsme7nAyH/view?usp=sharing [the initial conversation is in RU; use Grok-like translation]

This proves: Our system treats the "garbage in, garbage out" problem not as an obstacle, but as a central feature of the task.

Limited by Design Upon the successful implementation of the Verification Protocol, the party will initiate its orderly dissolution.

Citizens First No dominance of career politicians. We value expertise from society.

About Us

The Founder

A person with a mathematical mindset and, as the grandson of Holocaust survivors, deeply rooted in the responsibility to **create preventive mechanisms against the repetition of historical catastrophes**. This conviction led to the idea of an independent verification party—with the clear goal:

Never again.

A Note on Leadership and Personal Responsibility

The founder of this project is driven by the mission, not by personal ambition. His health is not robust, and he is aware of the physical demands such a task entails. Therefore, the following principle applies:

1. ***Mission Over Person:*** *The goal is the successful implementation of the Protocol. Leading the party is a service to this mission, not an end in itself.*
2. ***Open Invitation to Lead:*** *Should a capable person of integrity emerge who is willing to take on the leadership and advance the mission with full commitment, the founder will gladly step into the role of an advisor and mentor.*
3. ***Responsibility in the Interim:*** *Until a more suitable candidate is found, the founder will lead the party himself—acting as a fiduciary of the idea until sustainable leadership is established.*

This transparency is not an expression of weakness, but an act of strength and a consistent application of our own principles: honesty, transparency, and the unconditional priority of the cause.

Official Name

Mission: Enlightenment – Party for Independent Verification.

Our Rationale and Scientific Foundation

Our approach is built on a core principle: democracy works best—and avoids disasters—when it successfully harnesses the "[Wisdom of the Crowd](#)". However, the Wisdom of the Crowds can only function when the public has access to verified, truthful information. Without it, collective decision-making fails.

This is not just a political opinion; it is a mathematically demonstrable fact. The rigorous proof is laid out in the founder's "**Theorem on Disaster Prevention in Western Democracies.**"

The theorem models democracy as a collective estimation process (akin to the classic challenge of a crowd guessing the weight of an ox). It proves with a high degree of probability that such a system can reliably avoid catastrophic errors ***if, and only if***, a protocol for independent information verification is implemented.

Two Domains – One Mission: Our Digital Strategy

- www.pfp24.de – **The Movement:** The official website of the political movement. This is where we explain our mission, our bylaws, and our team.
 - **A Note on "24":** *In Germany's digital landscape, the number "24" is widely associated with 24/7 online services (e.g., the famous platform AutoScout24), not the year. The name pfp24 positions us as a modern, always-on digital service for democracy.*
 - *Status: Domain secured, platform under construction.*
- www.fakten-tuev.de – **The Tool:** The platform for our independent citizen service, the "Fakten-TÜV". Here you can use the verification protocol yourself, submit requests, and consult the "Socrates" bot.
 - *Status: Domain secured, platform under construction.*

"Clear Thoughts, Clear Politics. Because: There Must Be Order."
 (Klare Gedanken, klare Politik. Denn: Ordnung muss sein.)

- **A Note on "Ordnung muss sein":** *This is a classic German expression. We use it not as an authoritarian demand, but to signify that a stable, orderly society is the logical and desirable outcome of clear, fact-based thinking.*

Prüf-Fakten-Partei

Auftrag Aufklärung

OS für Demokratie 3.0

„Einmal installieren. Für immer sichern.“

Klare Gedanken, klare Politik. Denn: Ordnung muss sein.

Bylaws Highlights (Abridged from § 3)

- **(1) Integrity of Members – The Citizen Party:** We are a movement of citizens from all walks of life. Career politicians who have served within the last five years can only be admitted by a two-thirds majority vote at a party congress, after transparently demonstrating a significant societal contribution outside of their political activities.
- **(2) Radical Transparency:** We commit to monthly, proactive, and complete disclosure of all finances and decisions. All data is fed into the "Socrates" bot. We explicitly note that AI-generated answers are a simplification; only the original reports are legally binding.
- **(3) Primary Goal & Dissolution:** The sole objective is to legally establish the "Protocol for Independent Verification". After achieving this, the party's dissolution will be initiated.
- **(4) Continuation by Citizen's Request:** The party can only continue if an official petition to the German Parliament for its continuation reaches **one million verified signatures**. If this happens, a binding internal referendum of all party members will decide the party's future.
- **(5) Annual Founder's Audit:** To ensure the highest level of personal accountability, the founder is obligated to undergo a public audit every 13 months, which includes a live Q&A with the most popular citizen questions from the "Socrates" bot and a mandatory **Fakten-TÜV** review of his public statements
- **(6) Special Rules for the Founder – Protecting the Founding Spirit:**
 - **Term Limit:** If the party continues, the founder is irrevocably obligated to resign from all political offices after the first legislative period. He may accept the status of a non-voting "Honorary Founder" to serve as a moral advisor.
 - **The Last Resort (Ultima Ratio) – Dissolution in Case of Corruption:** The founder has the right to call a party congress to vote on dissolution if the party is involved in a major corruption scandal. A motion to dissolve requires a three-quarters majority vote.

When We Will Disband: Our Definition of Victory

Our mission is not vague—it has a clear, measurable end. We will initiate our dissolution as soon as the following objectives have been verifiably achieved:

1. **The Law:** A "Verification Protocol Act" has been signed into law, legally establishing the public accountability of officials.
2. **The Institution:** A new, politically independent federal agency (e.g., a "Federal Office for Public Verification") has been founded to implement this law.
3. **The Method:** Our citizen-driven tools—the "Fakten-TÜV" and the "Protocol of Correction"—have become the official and central working basis of this new agency.
4. **Democratic Control and Citizen Oversight:** The leadership of the new agency will be vested in an independent council of 12 respected figures from German society (e.g., retired judges, scientists, ethicists).
 - **Citizen Nomination:** The right to nominate members to this council belongs to the citizens. The nomination and selection of candidates will occur through a transparent, public process on the "Fakten-TÜV" platform. The final election of council members from this public pool of candidates will be conducted by the German Parliament (Bundestag) to ensure constitutional integrity.
 - **Dual Control:** The agency will be subject to dual control: parliamentary oversight by the Bundestag and direct **Citizen Oversight**. Every 13 months, the agency's leadership is obligated to undergo a public audit, in which they must answer the 10 most-voted citizen questions from the "Socrates" bot live.

Once these objectives are met, our mission is complete. We will have installed the operating system for a more honest democracy. Then, as promised, it will be time to begin the process of our dissolution.

The Defiant Manifesto

We know that any initiative that challenges the status quo will be attacked. The Lie does not surrender without a fight. We are prepared for this battle. We anticipate every attack and publish our defense strategy in advance. Their weapon is manipulation. Our weapons are transparency and logic.

Their Attack: Bureaucratic Sabotage

They will try to bury our law in endless committee meetings and formalities, hoping to suffocate the initiative in silence.

-  **Our Shield:** The Principle of Radical Transparency.
 -  **Our Counter:** We will publish the monthly "**Transparency Blockade Report.**" Using our protocol, we will publicly analyze how and by whom the work is being sabotaged, and how much taxpayer money each day of this delay costs. We will turn their own weapon—bureaucracy—against them.
-

Their Attack: "Ministry of Truth" / "Thought Police"

They will accuse us of being an undemocratic force that places itself above the elected parliament.

-  **Our Shield:** Our Bylaws. We are the opposite of a "Ministry of Truth": our **Fakten-TÜV** is citizen-driven, our methodology is open source, and our system acknowledges its own fallibility and is constantly learning.
-  **Our Counter:** The real attack on democracy is lying to the voters. We give citizens and parliament a tool for **informed** decisions. A democracy without truth is a fiction. We make it real.

⚔️ Their Attack: "Russian Spy" / "Foreign Agent"

They will use the founder's origin as a pretext to accuse us of being controlled by foreign powers.

- 🛡️ **Our Shield:** Our Actions. We publicly analyze the narratives of Russia, NATO, Great Britain, Israel, and others with the same, relentless logic.
- ⚔️ **Our Counter:** We will subject the accusation itself to a **Fakten-TÜV** audit and give the accusers 44 days to provide evidence. Their inability to do so will publicly expose their lie. Our protocol has no nationality; it serves only the Truth.

⚔️ Their Attack: Legal War of Attrition

They will overwhelm us with lawsuits to exhaust our resources.

- 🛡️ **Our Shield:** We will establish a public **"Fund for the Defense of Truth,"** where every transaction is transparent.
- ⚔️ **Our Counter:** Any person or organization that sues us will automatically become the subject of an in-depth **Fakten-TÜV** investigation. We will turn every court case into a public audit of the plaintiff.

⚔️ Their Attack: Discrediting the Method via "Experts"

They will hire loyal "experts" to portray our protocol as "pseudoscience."

- 🛡️ **Our Shield:** Our entire methodology and the source code for the "Socrates" bot are Open Source.

-  **Our Counter:** We will invite any expert to a public, live debate. Let the citizens decide for themselves whose arguments are more compelling.
-

Their Attack: Personal and Ad Hominem Attacks

They will attack the founder's health, his family, and his history to discredit him.

-  **Our Shield:** Our principle of the "**Annual Founder's Audit.**" The founder already undergoes the strictest public scrutiny.
 -  **Our Counter:** We do not comment on personal insults. That is the tactic of those who have run out of arguments. We ask everyone to judge not the person, but the **quality and honesty of our work.** The work speaks for itself.
-

Their Attack: Physical Threats and Elimination

In the most extreme case, opponents might try to physically stop the project by eliminating key individuals.

-  **Our First Answer: The Principle of Antifragility (The Uncaging of the Idea)** This project was deliberately designed so that it can be carried on by any capable entrepreneur or systems architect. The baton is ready to be passed.
 - **The Idea is Released:** The entire idea, methodology, bylaws, and strategy are in the public domain. They no longer belong to a single person—they belong to the world.
 - **Humility Before the Future:** And it is likely that a successor will do it even better. I lack the experience in building such complex organizations. It is also possible that a future version will be stricter and more efficient—perhaps without the 44-day grace period, which was born of wisdom, not necessity. That will be the successor's right.
 - **The Consequence:** Personal attacks on the founder are therefore strategically pointless. You can stop a person, but you cannot stop an idea whose time has come. Its realization is only a matter of historical necessity.

The Last Resort

We hope and pray that this mechanism will never have to be used. But as the old saying goes: "Hope for the best, prepare for the worst."

 **Our Second Answer: The Protocol for Anomalous Events (The Digital Notary)** We are aware of the physical risks. In the event of a sudden, unnatural death, a "suicide," or a suspicious accident involving the founder, an automated process will be triggered.

- **The Analysis:** An independent AI system will conduct a **statistical analysis of the null hypothesis**. It will check whether the event is consistent with the founder's publicly maintained health and lifestyle data, which has been recorded for years. (*Link to the methodology and anonymized data to be inserted here:* [Methodology](https://www.artiomkovnatsky.com/ru/posts/beyond_obvious/ai_dialogue_6): https://www.artiomkovnatsky.com/ru/posts/beyond_obvious/ai_dialogue_6, [Example Data](https://drive.proton.me/urls/E1S2R0E318#6UI57IXqptuu): <https://drive.proton.me/urls/E1S2R0E318#6UI57IXqptuu>)
- **The Testament:** This final report will be our public testament. Any attempt to silence us forever will thus become the last and most powerful proof of the righteousness of our cause.
