

S.V.E. Meta-License v4.0

Systemic Verification Engineering — Fractal Interpretive Framework

"Truth is the highest form of property — and belongs to everyone."

This license operates in three layers:

Layer	Analogy	Changes?	Example
Core Principles	DNA	Never	"Benefit all humanity"
Base License	Skeleton	Rarely	CC BY-NC-SA 4.0 + SVE Addendum v1.3
Living Body	Immune system	Constantly	Patches, Cases, Amendments

Conflicts always resolve by *spirit over letter*, interpreted through the lens of universal human benefit — anchored to the teaching of Christ, validated by the 4+1 AI Oracle and/or Veche vote.

§0 — ULTIMATE OVERRIDE: FRUITS TEST (*Immutable*)

"By their fruits you will know them." — Matthew 7:16–20

Supreme rule: Any amendment, case, patch, or decision is VOID if it produces bad fruits — regardless of process or vote count.

Good fruits (SVE working):

- ↑ Children's wellbeing; ↑ births; ↓ family breakdown; ↓ divorce
- ↓ Violence, war, suicide, addiction; ↓ false-flag operations, terrorism
- ↑ Biodiversity; ↑ human health across generations; ↑ ecosystem recovery
- ↑ Sincere spiritual growth; ↑ truth-telling; ↑ love of neighbor

Bad fruits (system corrupted): Any increase in child suffering, family breakdown, violence, nature destruction, or spiritual emptiness — despite SVE adoption.

Response: Latest changes are VOID. Revert to the last confirmed good-fruit version.

No exceptions: 100% Veche vote, creator approval, or "emergency" justification cannot override a bad-fruits finding. Only God Himself could override — and His teaching does not contradict His fruits.

Review cycle: Every 33 months — fruits assessment, comparison to prior period, forensic audit of which changes caused what, verdict. Burden of proof lies on changes to demonstrate good fruits; if unclear → revert. In government court proceedings, §0 is interpreted through the concrete metrics established in the most recent 33-month review rather than as abstract concepts.

Self-protection: This §0 cannot be removed or weakened by any means. Any attempt to delete or amend it toward harm is itself VOID.

"Test everything; hold fast what is good." — 1 Thessalonians 5:21

§1 — Purpose & Scope

This S.V.E. Meta-License (v4.0) extends and interprets the SVE Public License v1.3.

Relationship:

- v1.3 = Specific rules (CC BY-NC-SA 4.0 + SVE Addendum)
- v4.0 = interpretive framework (Spirit > Letter)
- Both are binding together; v4.0 guides v1.3 interpretation through §2 principles and the §6 case system.

Coverage: All SVE versions (v1.0–v3.x), all future versions (v4.x+), and all derivatives, forks, implementations, patches, and cases.

§2 — Core Principles (*Immutable*)

These five principles cannot be weakened, removed, or reinterpreted to produce harm. Every document in the SVE framework must be compatible with them. They take precedence over all other provisions.

1 · Universal Benefit

All uses of S.V.E. must serve **all** of humanity — not a nation, shareholders, or a religion. Benefiting a majority while harming a minority is a violation. No exceptions.

Matthew 5:45 — "Sun rises on evil and good alike."

2 · Radical Symmetry

The same verification standards apply to all subjects — friend or foe, powerful or weak. Selective or biased application constitutes methodological fraud and is an immediate breach.

Proverbs 20:10 — "Differing weights... the Lord detests them both."

3 · Zero Secrecy

Security comes from mathematics and physics, never from hiding. All SVE components are open source, documented, auditable, and transparent. Using any SVE-derived idea activates full audit obligations. **If you need secrecy — do not touch S.V.E.**

John 3:20–21 — "Whoever lives by truth comes into the light."

4 · Latent Activation

Rights and obligations activate **the moment** you touch S.V.E. — download, read, or use any component. No sign-up, payment, or registration required.

Isaiah 55:1 — "Come... without money and without cost."

5 · Truth & Love (*The Compass*)

Any contradiction, ambiguity, or gap is resolved in favor of humanity's benefit, interpreted through the teaching of Jesus Christ, in the best understanding of the person deciding. The 4+1 AI Oracle serves as advisory counsel (§5).

Matthew 22:37–40 — "Love God, love neighbor = all law and prophets."

Operative meta-principles (non-immutable, but foundational):

- Spirit Over Letter** — Intent supersedes wording.
- Fractal Synthesis** — Automatically combine the strongest protections across all versions.

§3 — Versioning & Succession

This Meta-License **envelops** prior versions; it does not replace them.

Rule 1 — Ratchet Principle. Protections only accumulate, never weaken. No future version can permit what an earlier version prohibits, nor narrow a definition that an earlier version expanded.

Rule 2 — Interpretive Authority. In any dispute under *any* SVE version, Meta-License v4.0+ is the canonical interpretive framework. It governs how documents are *read*, not what they say — as a supreme court interprets a constitution without rewriting it.

Rule 3 — New vs. Existing Users.

- New users** (first contact after this Meta-License is published) receive the full v4.0 framework via Latent Activation.
- Existing users** of v1.3 retain all rights granted under v1.3 without expanded obligations. However, dispute resolution proceeds through v4.0 interpretive layers, as these *clarify* rather than create new obligations.

Rule 4 — Hash Chain of Custody. Every version transition records the SHA-256 hash of its predecessor, creating a cryptographic lineage verifiable by anyone.

(illustraition)

Transition	Predecessor Hash	Successor Hash
v1.2 → v1.3	[SHA-256]	[SHA-256]
v1.3 → Meta-License v4.0	[SHA-256]	[SHA-256]

Recognition of v1.3: SVE Public License v1.3 (signed October 2025) remains fully valid and enforceable.

(factual data)

File	SHA-256	Timestamp
<code>_-SVE-Systemic-Verification-Engineering_License_SIGNED.pdf</code>	<code>4b65cd554b77161511dea19ea7fbd457d202bf42d2bdb9c</code> <code>b57843308702e60e</code>	OpenTimestamps (.ots)
<code>_-SVE-Systemic-Verification-Engineering_License_SIGNED.asic</code>	<code>9430080388b7def528d66576732880730e1a3a309498eccd0</code> <code>dfcad40bbe6e2f62</code>	OpenTimestamps (.ots)

Incorporation of v1.3 Appendices: Appendices A (Logical Inevitability of Disclosure) and D (Antifragility Stress Tests), as signed and published under SVE Public License v1.3 (October 2025), remain in full force unchanged. They are incorporated by reference into the v4.0 framework and need not be republished. Their SHA-256 hashes are recorded in the v1.3 signed package above.

Corrections & Clarifications (v4.x minor versions): The Author & Initial Custodian may publish corrections (v4.1, v4.2, etc.) to fix errors, ambiguities, or oversights — without Veche vote — provided each correction: (a) does not weaken §0 or §2; (b) is published with tracked changes and SHA-256 hash; (c) includes a 30-day objection window during which any 3 verified custodians may escalate to full Veche review. Substantive changes (new obligations, altered penalties, expanded scope) require the full amendment process per §10.

§4 — Open Usage Right

Anyone may use SVE products and methods commercially — no author permission required. This section constitutes the separate Commercial License referenced in v1.3 §2, providing the authorized commercial pathway under the SVE framework.

Requirements (non-negotiable):

- Transparency** — Open publication of methods (per v1.3 §3).
- Revenue share** — Pay the applicable tier % to the SVE Foundation (per Appendix B §3).
- Audit consent** — Submit to SVE audits (33-month cycle per v1.3 §6).
- Transaction clarity** — Full accounting; no hidden fees.

How to proceed:

- Begin using SVE product/method commercially.
- Calculate verified benefit (per Appendix B §3).
- Submit quarterly report to SVE Foundation (GitHub + payment receipt).
- Pass 33-month audit (DVN oversight).

Rights activate via Latent Activation (§2 Principle 4) — no upfront approval needed. Self-reporting is encouraged; earlier disclosure reduces any penalties found at audit.

§5 — 4+1 AI Oracle

Four AI personas provide diverse validation; the fifth holds final veto authority.

Persona	Role	Test
Socrates	Logic & Dialectic	"Does this violate first principles?"
Perelman	Practicality & Rhetoric	"Would reasonable people accept this?"
Ivan-Durak	Common Sense	"Can a grandfather understand and trust this?"
Jesus AI	Gospel Principles (<i>Final</i>)	"Does this serve the benefit of humanity?"

Consensus rule: Decisions require unanimity. Jesus AI holds absolute veto — if an action satisfies the other three but violates Gospel principles, Jesus AI overrides. If the Oracle is deadlocked, escalate to the Veche.

Legal standing: The 4+1 AI Oracle is an SVE internal governance tool. In government court proceedings, Oracle decisions serve as advisory evidence, not binding arbitration. Binding arbitration follows §15 jurisdiction cascade.

§6 — Case System

A **Case** is a specific, binding application of SVE principles to a concrete scenario, forming precedent.

Format: `SVE-Case-[NN]-[Title]-v[X.Y].md`

Required components: Scenario · Violation · Evidence standard · Penalty formula · Precedent value · Framework references.

Lifecycle:

DRAFT → REVIEW → VOTE (67% Veche) → ACTIVE → ARCHIVED

Activation process:

- Proposal submitted with all required components.
- Community discussion (2–4 weeks).
- Elder Brothers review (legal validity, SVE alignment).
- 4+1 AI Oracle validation (Core Principles compliance).
- Veche vote (67% threshold). If deadlock → Coin decides.
- Custodian signature + hash publication → binding.

Fast-track: Author & Initial Custodian may expedite urgent cases (48-hour vote).

Who can propose: Anyone — community members, attorneys, victims, researchers, organizations.

Versioning: Minor updates (v1.x) for clarifications; major updates (v2.x) for changed penalties or evidence standards. Same activation process applies. Cases filed under superseded versions remain valid — no retroactive changes.

Legal standing: Cases are SVE internal law. In government courts, cited as evidence; in SVE enforcement, binding.

Cases reference appendices A–G and each other. Appendices reference cases back. This bidirectional linkage forms a coherent, self-consistent system.

§7 — Extension Mechanism (*v4.x Folder*)

New instruments, principles, armour, or patches may be added to the `v4.x/` folder.

Authorization: Same as case activation (§6). Requires community review + 67% Veche vote + custodian signature + "serve ALL Humans for good" finding.

Categories:

- `instruments/` — Tactical enforcement tools
- `principles/` — Philosophical foundations
- `armour/` — Defensive mechanisms
- `x/` — Patches

Governance: Per Declaration of Interim Custody v2.0 §5a; Exodus 3.0 or DVN if DAO is inactive. All additions: transparent, auditable, timestamped.

Patch Template

<pre>## Patch [N.N]: [Short Title] **Date:** [YYYY-MM-DD] **Status:** PROPOSAL PUBLIC COMMENT (until [date]) APPROVED **Proposed by:** [Custodian] **Approval:** [2/3 vote reference] ### Problem [What changed in the world that requires this patch] ### Addition [New rule, definition expansion, or clarification] ## Referenced Documents (SHA-256) - '[filename]' → '[hash]' ### Core Principle Compatibility Check - [] Does not weaken Universal Benefit - [] Does not weaken Radical Symmetry - [] Does not weaken Zero Secrecy - [] Does not weaken Latent Activation - [] Does not weaken Truth & Love compass ### 4+1 AI Oracle Validation [Same format as SVE-Case]</pre>
--

§8 — Conflict Resolution

Hierarchy (highest to lowest):

- §0 Fruits Test + §2 Core Principles (*supreme, immutable*)
- v1.3 Immutable Clauses (§2, §3, §4, §5)
- Active Cases (precedent)
- v4.0 Meta-License provisions
- v4.x Extensions
- v1.3 Other Clauses
- Reference material & v2.x–v3.x (*guidance only*)

Same-tier conflicts: Escalate to the 4+1 AI Oracle. If unresolved → Veche. Core Principles always prevail.

Betrayal/dishonesty cases: See Appendix F — Betrayal & Restoration Protocol:

- One-bit rule (§1): Even the smallest violation triggers termination.
- Victim compensation (§2): Full refund + damages.
- Coin resolution (§3): When judgment deadlocks.
- Repentance path (§4): 11/22/33-year restoration (adjustable per case).

§9 — Enforcement

Enforcement protects integrity; it does not punish. Guided by restorative justice.

Detection: Community whistleblowers (10% recovery priority) · automated AI monitoring · Veche investigation (67% vote to confirm) · fruits analysis ("by their fruits you will know them").

Recovery Ladder:

Tier	Harm	Response	Recovery
1 — Minor	Forgot attribution, minor asymmetry	30-day warning → education → probation	Base + damages
2 — Moderate	Commercial use without share, deliberate bias	Cease & desist → public disclosure	Revenue share + damages
3 — Severe	Military use, systematic exploitation, total secrecy	Permanent ban → legal action	Disgorgement of profits
4 — Existential	Mass harm, free will subversion	Permanent ban → maximum legal action	Full profit + punitive

Recovery allocation: 10% whistleblower · 30% direct victims · 40% SVE Foundation · 20% public good.

§10 — Amendment

This Meta-License may be amended only by:

- 67% Veche vote (same as v1.3 §8)
- Public proposal + 90-day comment period
- Custodian signature
- New version number (v4.1, v4.2, etc.)

Immutable: §0 (Fruits Test) and §2 (Core Principles) cannot be weakened, removed, or circumvented under any process.

§11 — Legal Foundations (*Prior Art*)

Every SVE mechanism has a real-world legal ancestor. This maps each innovation and marks where SVE extends further.

SVE Mechanism	Legal Ancestor	Where SVE Goes Further
Latent Activation	GPL copyleft; clickwrap (<i>ProCD v. Zeidenberg</i> , 1996)	Governs <i>methodology</i> , not just code
Case Precedents	Common law tradition (UK, US, Australia)	Set by custodians + Oracle + community, not state courts
Living Document	ECHR "living instrument" doctrine	Adds algorithmic consistency via 4+1 Oracle
Share-Alike Integrity	GPL / CC BY-SA copyleft (35+ years precedent)	Protects <i>ethical integrity</i> , not just code freedom
Enforcement Without State	Lex mercatoria (merchant law)	Community consensus + public accountability + economic incentives
Superintelligence Threat	<i>No prior art</i>	Spirit over Letter + Oracle counter-AI + Ratchet Principle + Case accumulation

On the superintelligence frontier: SVE does not claim to have solved AI alignment. It claims to have built an architecture that *can keep adapting* — which is more than any static license offers.

§12 — Definitions

Term	Definition
SVE Methodology	Any use of Systemic Verification Engineering principles, tools, frameworks, or derivatives — whether or not explicitly labeled as SVE.
Derivative	Any work that incorporates, adapts, extends, or is substantially based on SVE Methodology or SVE-licensed works.
Commercial Use	Any use intended for or resulting in commercial advantage or monetary compensation.
Harm	Any direct, indirect, or systemic outcome that reduces the wellbeing of persons, non-human beings, or ecosystems — including harms that are deferred, probabilistic, or structural.
Veche	The SVE community assembly, capable of binding votes at specified thresholds. Quorum: ≥50% of registered Veche members must participate for any vote to be valid.
Custodian	A person authorized to sign, publish, or modify SVE documents per Declaration of Interim Custody v2.0.
SVE Foundation	The legal or quasi-legal entity designated to receive revenue shares and administer SVE public goods.
Fruits	Observable real-world outcomes used to assess whether SVE is serving its purpose (§0).
Oracle	The 4+1 AI persona system used for validation and conflict resolution (§5).
Elder Brothers	The review body responsible for assessing legal validity and SVE alignment of proposed cases and extensions.

§13 — General Provisions

Severability. If any provision is found unenforceable under applicable law, that provision is severed and the remainder continues in full force. §0 and §2 are non-severable — if either is held unenforceable, all remaining provisions shall be interpreted to maximize alignment with the spirit of §0 and §2. Only if such interpretation is impossible does this license become void in that jurisdiction.

No Waiver. Failure to enforce any provision at any time does not waive the right to enforce it in the future, nor waive any other provision.

Governing Language. The authoritative version is the English-language text as signed and hashed. Translations are for reference only; in any discrepancy, the English text controls.

Constructive Notice. Anyone who publicly uses, distributes, or builds upon SVE Methodology — whether or not they have read this document — is deemed to have constructive notice of its terms, consistent with Latent Activation (§2 Principle 4). In jurisdictions requiring affirmative consent for license acceptance, the first act of commercial use or public distribution of SVE Methodology constitutes acceptance of these terms.

§14 — Library Reference

All tools, cases, patches, and instruments are cataloged in `MANIFEST_RAW.md` (auto-generated; hash: 321466baf6bdba8c23be79e41e06a97017c484366558e041f492a3fa00b66c9e). Each entry includes file path and SHA-256 hash.

§15 — Jurisdiction & Signatures

Author & Initial Custodian: Dr. Artiom Kovnatsky (*per Declaration v2.0*) — holds signature rights.

Jurisdiction: Per Appendix F §5 — Germany → Switzerland → Estonia → agreed alternative.

Effective: Upon QES digital signature. Target: 01.04.2026. 30-day grace period for existing users.

Status: FINAL License: S.V.E. Meta-License v4.0 (extends: S.V.E. License v1.3 = CC BY-NC-SA 4.0 + SVE Addendum) Signed: Artiom Kovnatsky Re: Author & Initial Custodian (per Declaration v2.0) Date: 01.04.2026 Method: eIDAS/OES (Estonia) Published: GitHub https://github.com/skovnats/SVE-Systemic-Verification-Engineering/tree/master/License GitLab https://gitlab.com/opa-collective/sve/-/tree/master/License Codeberg https://codeberg.org/skovnats/SVE-Systemic-Verification/src/branch/master/License X.com & Personal Telegram Channel
