ASPE I THE SWITCH

ALL previous posts and behavior up to 16.04.2026 11:22 CET were (perhaps) part of the Art-Scientific Performance-Experiment (ASPE).

From now on:

ENTREPRENEUR-DISRUPTOR-NORMAL MODE IS ON.

The Operating Protocol (switching modes "with tagging"):

(perhaps) It's not a bug, it's a feature.

;)

2Investors+:

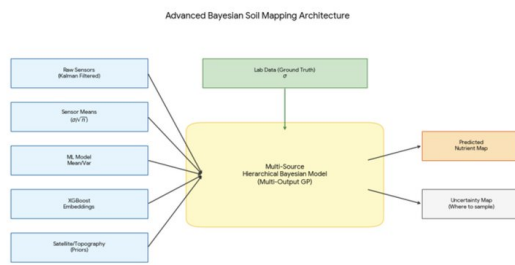

The Stenon founders are solid guys.

With some adjustments, I see world-level potential. Please support them — they are in the final stages of a raise AFAIK.

Important:

Their focus is on sustainability, not just a quick "exit." Consider this if it aligns with <https://t.co/Z7QiBVkJIX>

Bayesian Optimization for Field Nutrient Mapping [Concept] [Draft]

1. Data Processing & Feature Engineering

The "All-In" Feature Set

Instead of feeding only mid-points, we feed a rich feature vector into the GPyTorch model.

- **Target (y):** Nutrient values (Nitrogen, etc.).
- **Coordinates (\$x_s\$):** Latitude, Longitude (normalized).
- **Time (\$x_t\$):** Days since a reference date (e.g., start of season).
- **Covariates (\$x_c\$):** * **CatBoost/XGBoost Embeddings:** Extract the last hidden layer or leaf indices. These act as "latent features" that describe the soil's chemistry beyond just spatial

IMPORTANT from me personally: > Please be fair, not jerks!

Also, no need to mention me — they do not know me from "this side," they only know a "simple mathematician that works as a Data Engineer lacking an AWS certificate".

Maybe, if you want, you can mention it AFTER the

Greetings to Jochen from Stenon (where I work) from a simple mathematician ;)

[He'll get the joke... I think]
