Personal Appeal of the Grandson of Holocaust Survivors (not all survived) to the German Constitutional Court and the German People

I

My name is Artiom. An ordinary person with an extraordinary, perhaps, life path. Where I survived and what I went through — many did not survive. My health has suffered, but I do not complain — everyone carries their own Cross.

Born on Artyom Street in Mykolaiv (20.03.1984). Briefly: you are being lied to about “democracy” in the USSR after its collapse — it was horrific, many did not survive. We were treated like “natives,” though by the letter of the law everything was “clean.” Consider me someone who survived Hell, became a scientist, and brought tools (SVE) to bear witness — for myself and for hundreds of thousands who perished.

I follow the teaching of Jesus Christ — in essence, less in form. Consider this my sacrifice for you and others who, through ignorance, may be leading us toward catastrophe.

Gratitude

First, I wish to express gratitude to Germany and the German People for their hospitality: you took me in (now my family too), treated me with respect, provided honest opportunities WITHOUT discrimination — until September 2025, when I began the archive protocol 444 DAYS.

Audit and Method

I conducted a nonlinear system audit. My forecast: everything is heading toward catastrophe — war and ruin. **I would be very glad to be wrong.** To conduct the audit, I had to play the “eccentric scientist,” damage my reputation (public article retractions etc.), and sacrifice health. Einstein said: you must stand OUTSIDE the system to analyze it. I deliberately BECAME that “outsider.” Evidence: Community > Signals_Potentially_Anomaly.

The Case of Dmitry Krasnikov

My childhood friend **Dmitry Krasnikov** was kidnapped by the TCC and “transferred for training to Germany.” He deserted. **Please inquire about the fate** of Dmitry, Viktor Krasnikov, and Vladislav Timoshchuk. Official requests: Community > OpenLetters > DE.

Five Unanswered Questions

Q1 — Humanitarian corridor for ALL non-combatants. **Q2** — Gender discrimination in exit rights. **Q3** — Taxpayer money without human rights conditions. **Q4** — Declassification of non-critical NATO-Ukraine documents 1990–2022. **Q5** — Cyberattack on my archive (~08.04.2026), Art. 1 GG. (Full text: QUESTIONS.md.)

SIP and Findings

(Meta-)SIP = Socratic Maieutics with AI. All data public, reproducible. Result: **the Western mainstream narrative FUNDAMENTALLY diverges from the method's findings.** Röpcke and Sternenکو refused a rebuttal. Even 10% accuracy = tens of billions of euros and tens of thousands of lives. Risk management demands an audit.

On the “Russian Soul”: Spirit vs. Letter of Law

For Germans: Ordnung. For Russians: **JUSTICE = TRUTH.** The written contract is secondary — the SPIRIT matters more than the LETTER. Gorbachev's oral assurances = almost a treaty. +/- all conflicts with Russians stem from this gap. **Proposal:** treaties with a formal Letter≈Spirit guarantee + polygraph + AI consistency checks. Inspections of CONSCIENCE.

“Never Again” Means NEVER AND WITH NO ONE

Why aren't Germans liable for Hitler, but ordinary Russians should be? Sanctions based on nationality, disguised through legality, that violate the spirit of law — must be revoked against ANY nation. Why is “Deutschland über alles” taboo but “Україна понад усе” normal? **Forced conscription of people AGAINST THEIR WILL must IMMEDIATELY stop.**

The Case of Diana Panchenko

My analysis **fundamentally contradicts the commission's findings.** What statistical tests? p-values? Reference base? Without statistics = **censorship.** I wrote every major German journalist as a Holocaust grandson — no one responded. Why is that bias normal? **Demand:** labeling instead of blocking, scientific methodology.

Offer

My analysis: the war could have been avoided. I offer my services for free. **Condition:** full disclosure of all non-critical files. **Competence and love of humanity** — “Love your enemies.” Test your politicians privately through SVE/SIP.

Appeal to the Judges

Please take everything seriously. Maximum silence for you. I have done my part. You are the Fathers of the German People. **ALL non-critical Ukraine-NATO data** must be examined and disclosed.

Why I Do This. Criterion of Success

Criterion of success = systemic change, not punishment. Independent verification that makes entropy accumulation impossible = “fire safety sensors” in democratic architecture.

My analysis: **had I been born and raised in Germany, I would most likely have acted like “Julius Nebel.”** The cause is SYSTEMIC. **NO ONE should be personally punished** (except for proven deliberate excess). Only systemic changes.

Do NOT ban evil — study it. “Mein Kampf” should be published with expert commentary. Identify thinking patterns, concept substitutions, logical fallacies. I studied it and found manipulations at the level of LOGIC. Same with the modern Ukrainian myth — it did NOT pass the SVE protocol.

Bottom line: systemic changes. Fire safety sensors. Study of evil. Immunity instead of ignorance.

Closing

Final version: **08-09.05.2026** (“Omega”). Forgive the rough form — I write improvisationally, fearing for safety. As Socrates and Jesus were killed for truth, there are forces that profit from war and fear transparency.

Important: I am a scientist. If anyone finds an error in my arguments, I will publicly apologize and correct it.

P.S. Gödel’s incompleteness theorems: every axiomatic system contains unprovable statements. The foundation is faith in what we cannot prove. The only question is: in what.

Thank you for your attention.
(perhaps) with God!
