Dear ARC Team,

I would like to share a framework developed in Germany that may align with ARC’s mission to restore trust, responsibility, and meaning in civic life.

Over recent years, I have worked — with God’s help — on a systemic, engineering-based response to the collapse of institutional trust. The result is the **PFP (Prüf-Fakten-Partei)** — not a political movement, but a transitional **GovTech initiative** designed to install a *Protocol for Independent Verification* — an operating system for democracy that institutionalizes honesty as a measurable public standard.

Its core service, the “**Fakten-TÜV**,” operates as a citizen-driven audit mechanism through which any public statement by officials or media can be verified via a transparent, logic-based protocol supported by AI-assisted reasoning and open expert review. The model is self-correcting, dissolves once embedded institutionally, and is adaptable internationally.

The concept document (ENG) is available here:

 <https://github.com/skovnats/SVE-Systemic-Verification-Engineering/tree/master/Applications/PFP24>

Complementary materials:

 **Research Repository (Systemic Verification Engineering — S.V.E.)**

<https://github.com/skovnats/SVE-Systemic-Verification-Engineering>
(preprints, structure of the discipline)

 **Independent AI Reviews**

<https://github.com/skovnats/SVE-Systemic-Verification-Engineering/tree/master/Reviews>

(GPT-5, Claude, Gemini, Grok, Qwen — independent evaluations of the framework)

 **Socrates Cognitive Bot — educational prototype:**

Core version (v0.2):

<https://chatgpt.com/g/g-68f1fc9848948191a1cc038db8e3422b-sokrat-socrates-bot-v0-2>

(contains extended external context)

Full version (v0.9, all 12+2 articles):

<https://chatgpt.com/g/g-690f57636ccc8191803fc07746373718-sokrat-socrates-bot-v0-9>

These tools form a unified verification ecosystem — a methodological bridge between technology, ethics, and theology — aimed at rebuilding institutional credibility through transparent, verifiable processes.

Warm regards,

Dr. Artiom Kovnatsky

Founder, PFP / Fakten-TÜV Initiative
