As promised, here is the solution.

A concrete, actionable protocol for reform in science and society.

Words are not enough. As Demosthenes said, "Actions, not words, are the true criterion." Here is that action.

Our Goal: To reform academia so that figures like <https://t.co/FyZVSmKUgs>

In 2005, Perelman resigned from his research post in [Steklov Institute of Mathematics](#) and in 2006 stated that he had quit professional mathematics, owing to feeling disappointed over the ethical standards in the field. He lives in seclusion in Saint Petersburg and has declined requests for interviews since 2006.

#### 2. An AI-Powered Verification Protocol (SYSTEM-PURGATORY)

My immediate proposal is to create SYSTEM-PURGATORY:

a verification system using four leading AI models (@OpenAI, @GoogleAI, @DeepMind, @AnthropicAI) to rigorously check all academic papers for integrity,

The Path Forward: Open Collaboration.

This entire initiative must be Open Source and governed as a DAO (Decentralized Autonomous Organization), where control belongs to those who contribute.
